Graphic Design / Web Design

Wordpress / Elementor / HTML / CSS

Problem Solving / Analysis

Teamwork

## SKILLS

Sketch / Figma

Photoshop / Illustrator

Adobe XD / InVision

Slack / JIRA / Osana / easy learner

## ABOUT ME

I care about the details and consider the interactive design of affordances to be crucial in creating effective, intuitive interfaces. I like prototyping – it helps me think through interaction models and new possibilities.

I really love electronic music, mountain biking, and swimming. I enjoy different paths to see things from a fresh perspective :)

## OBJECTIVE

I'm looking for a part time or a full time position where I can better develop my entry level skills and help the company to achieve its goals and help to fix the problems that it might be facing. I've been always doing a freelance work but now, it's time to join a new team and interact with other designers and developers to design ideas to grow and create experiences together.

## EXPERIENCE

### UX/ Web and Graphic Designer

Freelance

2015-present

Worked in a interdisciplinary team of developers and designers to carry out innovative and experimental projects. I have worked on brands such as Net4Guest, Geometric Sounds, Season X, Mother-Fit and more. I've worked with IT companies, fashion agencies, healthcare studios, music events agencies and also taken on solo projects. The work has been primarily in the realms of branding, responsive site design, UI design and contributed to the visual design of the websites promoting an internal project.
